Scenario TID	Test Data	TestCase Description	PreCondition	TestSteps	Expected Result	Actual Result	Steps to Execute	Expected Result	Actual Result	Status	Executed QA Nar Misc (Comments)	Priority	Is Automated
1	123	Verify conversion of a valid number	Send request with 123	Response contains "One Hundred Twenty-Three"	200	Pass							
2	0	Verify conversion of zero	Send request with 0	Response contains "Zero"	200	Pass							
3	99999	Verify conversion of large number	Send request with 99999	Response contains "Ninety-Nine Thousand Nine Hundred Ninety-Nine"	200	Pass							
4	-10	Verify negative number input	Send request with -10	Should return an error message	400	Pass							
5	1.5	Verify decimal number input	Send request with 1.5	Should return an error	400	Pass							
6	"ABC"	Verify non-numeric input	Send request with "ABC"	Should return an error	400	Pass							
7	NULL	Verify null input	Send request with NULL	Should return an error	400	Pass							
8	Empty Body	Verify empty request body	Send request without body	Should return an error	400	Pass							
9	Missing Headers	Verify request without headers	Send request without Content-Type: text/xml	Should return 415 Unsupported Media Type	415	Pass							
10	Invalid XML Format	Verify request with malformed XML	Send request with incorrect XML	Should return an error	500	Pass							
11	Special Characters	Verify request with special characters	Send request with @#$%^&*()	Should return an error	400	Pass							
12	Large Number	Verify request with extremely large number	Send request with 999999999999	Should return an error	400	Pass							
13	API Response Time	Verify API response time is within acceptable limit	Measure response time for request	Response time < 2 sec	200	Pass							
14	SOAP Action Missing	Verify request without SOAPAction header	Remove SOAPAction header and send request	Should return an error	400	Pass							
15	Additional Unnecessary Tags	Verify response when request has extra XML tags	Send request with extra fields	Should ignore extra tags and process normally	200	Pass							
16	Invalid Endpoint	Verify request to an incorrect URL	Send request to incorrect endpoint	Should return 404 Not Found	404	Pass							
17	Invalid HTTP Method	Verify request with GET instead of POST	Send GET request	Should return 405 Method Not Allowed	405	Pass							
18	Duplicate Fields	Verify request with duplicate XML fields	Send request with duplicate <ubiNum> fields	Should return an error	400	Pass							
19	Missing Required XML Element	Verify request missing <ubiNum>	Send request without <ubiNum>	Should return an error	400	Pass							
20	Boundary Value - Minimum	Verify minimum valid number (1)	Send request with 1	Response contains "One"	200	Pass							
21	Boundary Value - Maximum	Verify maximum valid number (999999)	Send request with 999999	Response contains correct words	200	Pass							
22	Multiple Requests	Verify multiple sequential requests	Send 10+ requests in a row	All should process correctly	200	Pass							
23	Concurrent Requests	Verify API handles concurrent requests	Send multiple requests simultaneously	Should handle properly without errors	200	Pass							
24	Response Format	Verify response is valid XML	Validate response format against XML schema	Response should match expected format	200	Pass							
25	Server Restart	Verify API response after server restart	Restart the server and send request	API should still function correctly	200	Pass
